# ABOUT US

**Zeconex** is the leading manufacturer of electric vehicle charging systems in the global market, headquartered in Shenzhen, China.

Our product portfolio consists of Portable Charger, AC Charger, DC Charger, Power Module and Cloud Management System and Mobile APP, all independently developed by ourselves. We exported to more than 30 countries and regions since 2012.

With over thousands of charging systems sold worldwide, Zeconex's DC Fast Chargers and AC Chargers serve Charge Point Operators, Oil & Gas, Convenient Stores, Retail Centers, Fleets and more for charging electric vehicles, heavy duty transit shuttle and school buses, fleets, and other specialty vehicles.

Our top R&D team both in China and abroad, with rich experience in international protocol (OCPP 1.6 above) , which support us to offer OEM/ODM service for our clients all over the world.

**Welcome to be our partners.**

## Why Choose Us

### 10+ years Expert

More than 10+ years Leading Manufacture in EV Charging Industry.

### Quality Control

Zeconex only focus on the best quality ev charging products to make sure our business partners relieved and long time working with us.

### Production Capacity

We own and share 3 factories more than 300 employees and over 20,000 square meters area,each factory focus on different products line.

### Strong R&D

We keep on innovation and products developing all days to meet the edge-leading demand of the market. We are good at learning from your suggestion to make the most perfect product.

### Lead Time

We have the ability to do large material stock for our standards products to ensure your fast lead time request.

### OEM/ODM Customization

Our top R&D team both in China and abroad, with rich experience in international protoco, which support us to offer OEM/ODM service for our clients all over the world.

## Production Center

# Our solutions for home use

## Dynamic Load Balance

Dynamic Load Balance is a smart charging feature which balances the distribution of the total available power between chargers and other loads within the building in real time. It not only protects appliances, but also ensures EVs are fully charged at the lowest cost.

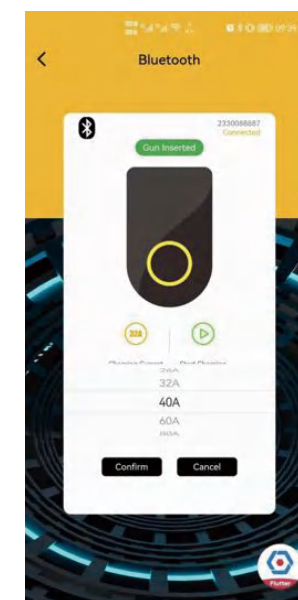

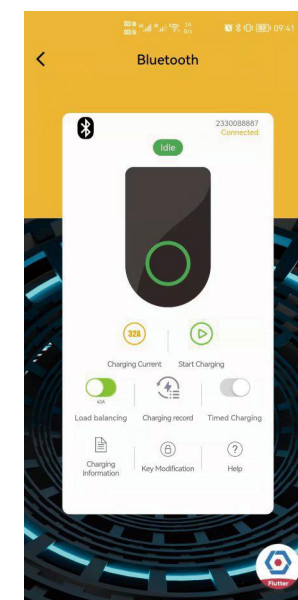

CT box monitors the total energy consumption and reports to the management system. The system controls the charging power of each individual charger automatically to avoid overloading when chargers and other loads are being used simultaneously.

## Static Load Balance

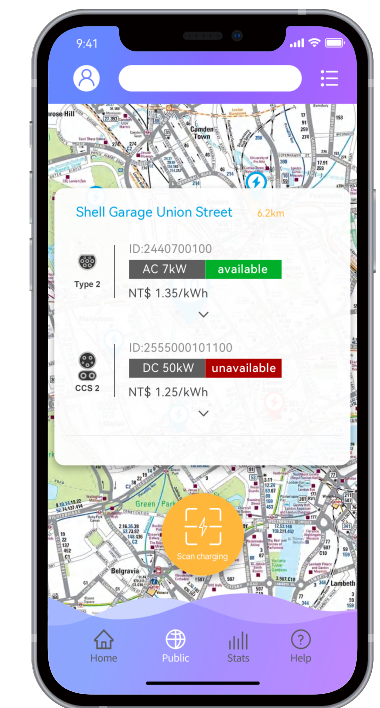

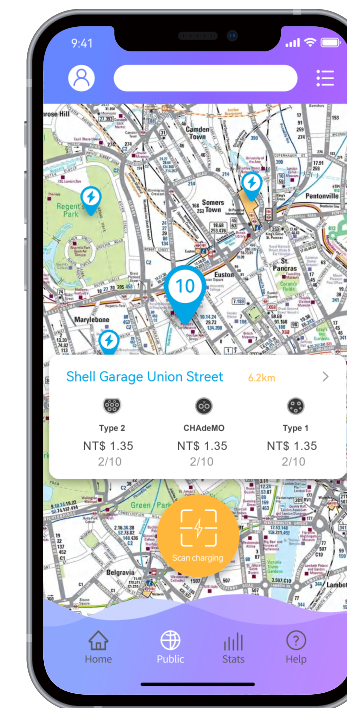

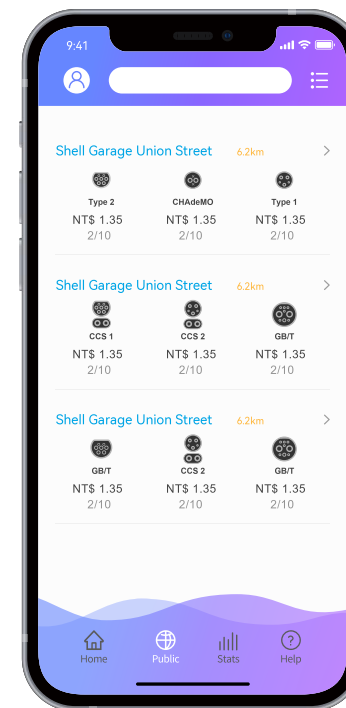

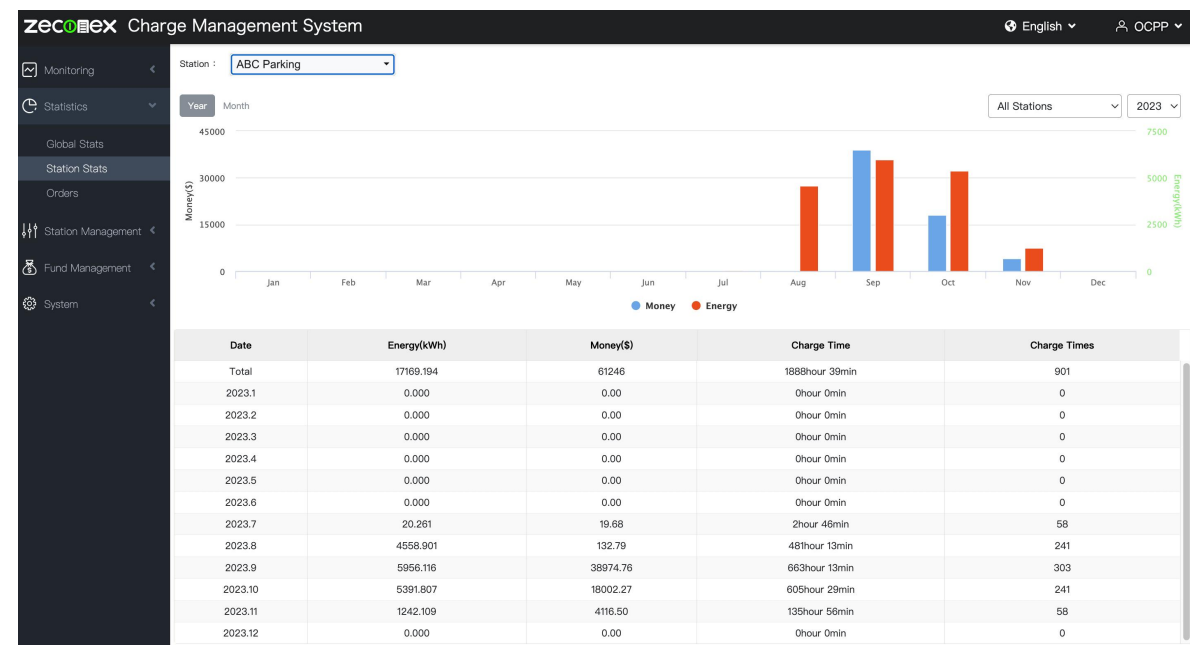

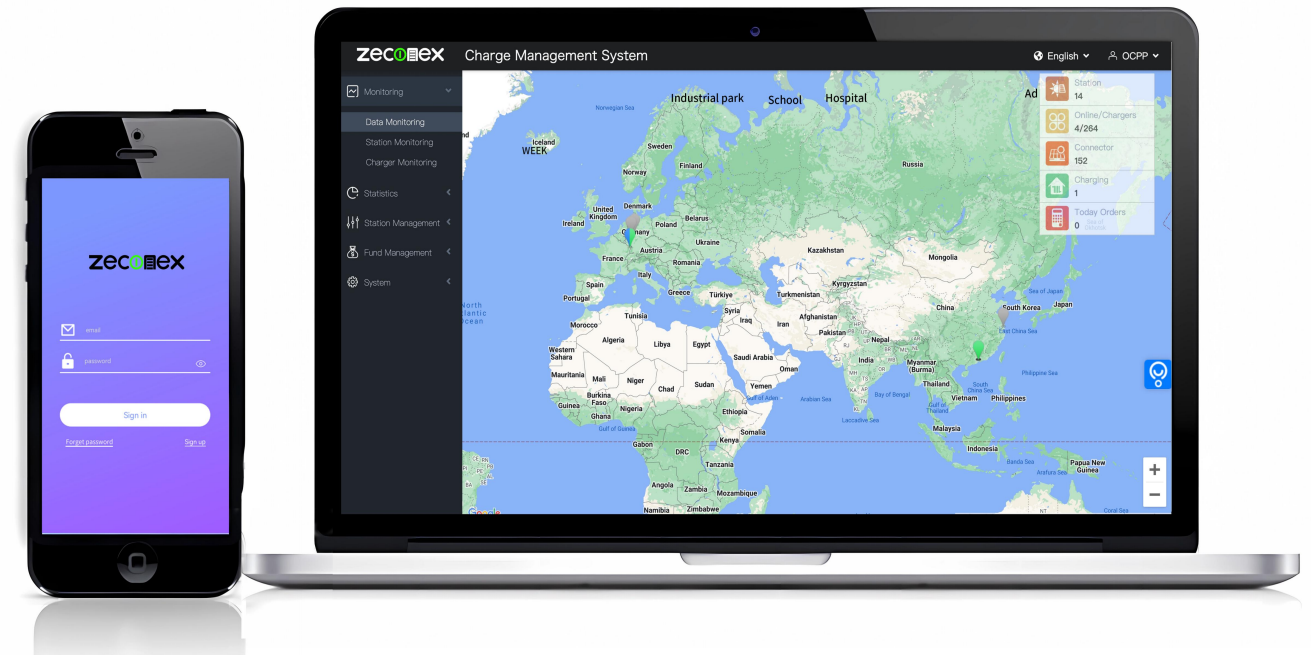

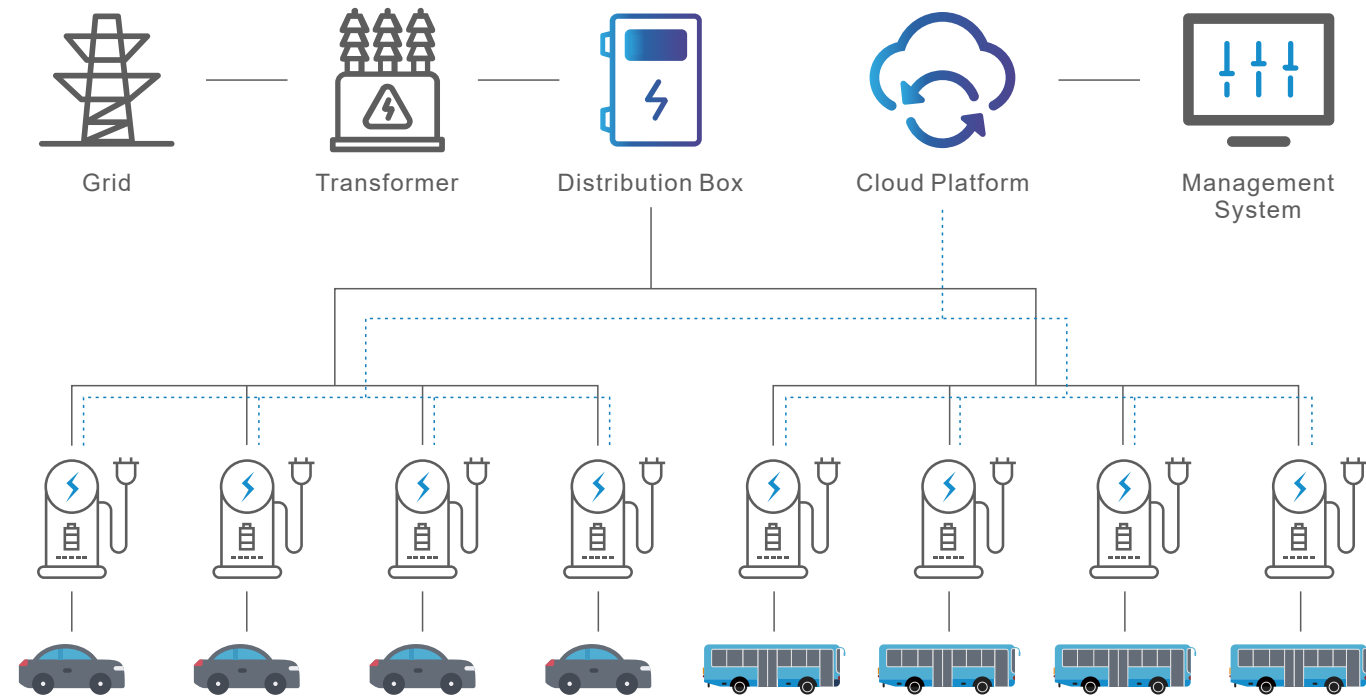

Static Load Balance is a smart charging feature which balances the distribution of the total available power for multiple chargers at a specific location. It enables you to set a maximum power for multiple chargers in the management system and distribute the charging power evenly between the individual active chargers.

Load balance helps you to protect the local grid within the capacity limit in peak hours of electricity consumption. EVs can charge with maximum power when possible, but the charging power will drop as more EVs begin to be charged simultaneously. For example, the parking lot has a maximum of 32A available. When the first EV charges, it charges at 32A – the maximum capacity. When more EVs start charging, the charging capacity will be distributed evenly over the EVs

# Our solutions for public

We provide everything that's needed to build a charging business, from charging facilities to customer services and smart energy management solutions. You can either manage your own network of charging stations or provide the service for other charger operators. All solutions are white-labelled and can be customized to meet your customers' needs

# Project Cases

# Portable EV Box

## Secure and Safe

Type A+DC 6mA leakage protection  
Over temperature protection  
High protection grade up to IP65

## Friendly Interface

OLED Display  
Current can 8A, 10A, 13A, 16A, 20A, 32A, adjustable

## High compatibility

Fully compatible with all ev in the market

# MINI DC Series

20KW-30KW-40KW the best charging station  
For EV fast charger

## Friendly interface

7-inch touch screen LCD and ring LED offer good user display requirements for charging.

## Simple control

It is easy to control on and off through the Bluetooth function of the mobile phone APP and RFID function.

## Fast and Safety

40KW CCS type 2 plug, more efficient charging  
IP54 protection level for outdoor installation.

## Wide application

Compliant with OCPP 1.6 and above enables it to connect to the global EV charge management platform without additional integration and matching.

Intelligent operation by App and cashless payment

## Flexible Option

App operation or RFID authentication or plug and play  
High protection grade as IP54, with IP65 optional  
Optional POS terminal for contactless credit card  
payment

## Secure and Safe

Type A RCD for residual current protection  
PTB certified energy meter with accurate measurement  
ISO15118 prepared for advanced feature of Plug & Charge

Model	ZECO120K-D7	ZECO160K-D7	ZECO180K-D7	ZECO240K-D7
<b>Technical features</b>				
Max Power	Up to 120KW	Up to 150KW	Up to 180KW	Up to 240KW
Input / Output Power	400VAC±10%-50/60Hz-3phase	400VAC±10%-50/60Hz-3phase	400VAC±10%-50/60Hz-3phase	400VAC±10%-50/60Hz-3phase
Power factor	≥0.98			
Efficiency	>95%			
Measuring Accuracy	Level 0.5			
Output Voltage Range	CCS: 250~1000VDC			
Output Current Range	0-250A	0-250A	0-250A	0-250A
Communication	PLC (between charger & vehicle) Ethernet / 4G / OCPP 1.6J (Optional)			
User Interface	LCD 7 Inch Touch Screen / RFID Card and APP			
Versatility	EN / IEC 61851-1: 2019, EN / IEC 61851-23: 2014			
Security Design	Over/under voltage protection, overload protection, current leakage protection, grounding protection, lightening surge protection			
DC Plugs	CCS2 Cable 5M or 7M (Optional)			
Energy Meter	CE Certified			
RCD	ype A or Type B (Optional)			
<b>Physical Properties</b>				
Warranty	2 Years			
Cooling	Air Cooled			
IP Level	IP54			
Sound Noise	<70DB in all Directions			
Operating Temperature	-20°C to +50°C			
Humidity	Max.95% (Non-Regulating)			
Dimensions	750*770*1900mm			
Package Dimension	800*850*2000 (L*W*H) mm Wooden Packing			

# Super DC Series

120-240KW the best charging station  
For EV fast charger

## High Efficiency

One charger with two outputs, simultaneously charging  
Two CCS2 DC connectors, with output up to 240kW  
Constant power from 250~1000V voltage, less heat with  
smaller current

## Intelligent Control

Ethernet / 4G / communication all supported  
OCPP1.6 communication protocol with CMS  
Intelligent operation by App and cashless payment

## Flexible Option

App operation or RFID authentication or plug and play  
High protection grade as IP54, with IP65 optional  
Optional POS terminal for contactless credit card  
payment

## Secure and Safe

Type A RCD for residual current protection  
PTB certified energy meter with accurate measurement

# Cloud Platform

Dedicated to enabling the future of e-Mobility by providing the most open, secure and robust charging network anywhere. A charging platform based on the cloud server makes it simple for charger owners to operate and customize chargers to meet their specific requirements. We provide everything you need to offer a complete EV charging solution.

- ▶ **Management System:** A central system for charger operators manage charge points and monitor charging service. Status monitor, charger record, price management, firmware upgrade, remote diagnose, and load balance are offered in one capable system.
- ▶ **Mobile App:** A charging App for EV drivers who needs charging service. Price, locations, availability, start/stop charging, and auto billing are available in an easy way.
- ▶ **Interoperability:** Connections while e-Mobility Service Providers who have EV drivers as customers are viable through the open charge point interface protocol (OCPI)

# Mobile APP

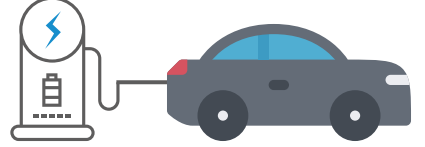

The charging App connects EV drivers with charging stations, so that they can easily find a charger and enjoy the charging service. It enables users to do location search, charging monitor and payment settlement. All is done in a mobile phone.

-   
**Account Signup**  
Easy signup with a mobile phone number
-   
**Location Search**  
Quick search for available charging facilities
-   
**Charging Operation**  
Friendly interface and convenient operation

-   
**Real Time Monitor**  
Real time presentation of charging consumption
-   
**Cashless Payment**  
Mobile payment from credit card, like Nets, PayWay
-   
**Auto Billing**  
Secure billing through registered account

- 1 Download the App and sign up an account. 
- 2 Plug the charging cable into EV. 
- 3 Scan QR code to start charging. 
- 4 Stop charging in the App and settle payment automatically.
